

# Design Concept

## Following Fashion and Music

Our design concept initially started by trying to think of recycled materials that we could use to make the dress. We came up with using recycled CD's and 45 records and albums. In the age of iPods and other MP3 players as well as iTunes not many people know what to do with the discarded CD's. So, that took us on the journey of music devices through the years. We decided to design each dress with a silhouette that was popular in the same era as the music device used to make the dress was also popular.

The dress made from CD's had a late 80's/90's silhouette and the dress made from 45's and albums has a classic 50's "housewife" or June Clever silhouette.
