

DCTC Sensory Room

OBJECTIVE

To create a calming study space for individuals who are sensitive to sensory input.

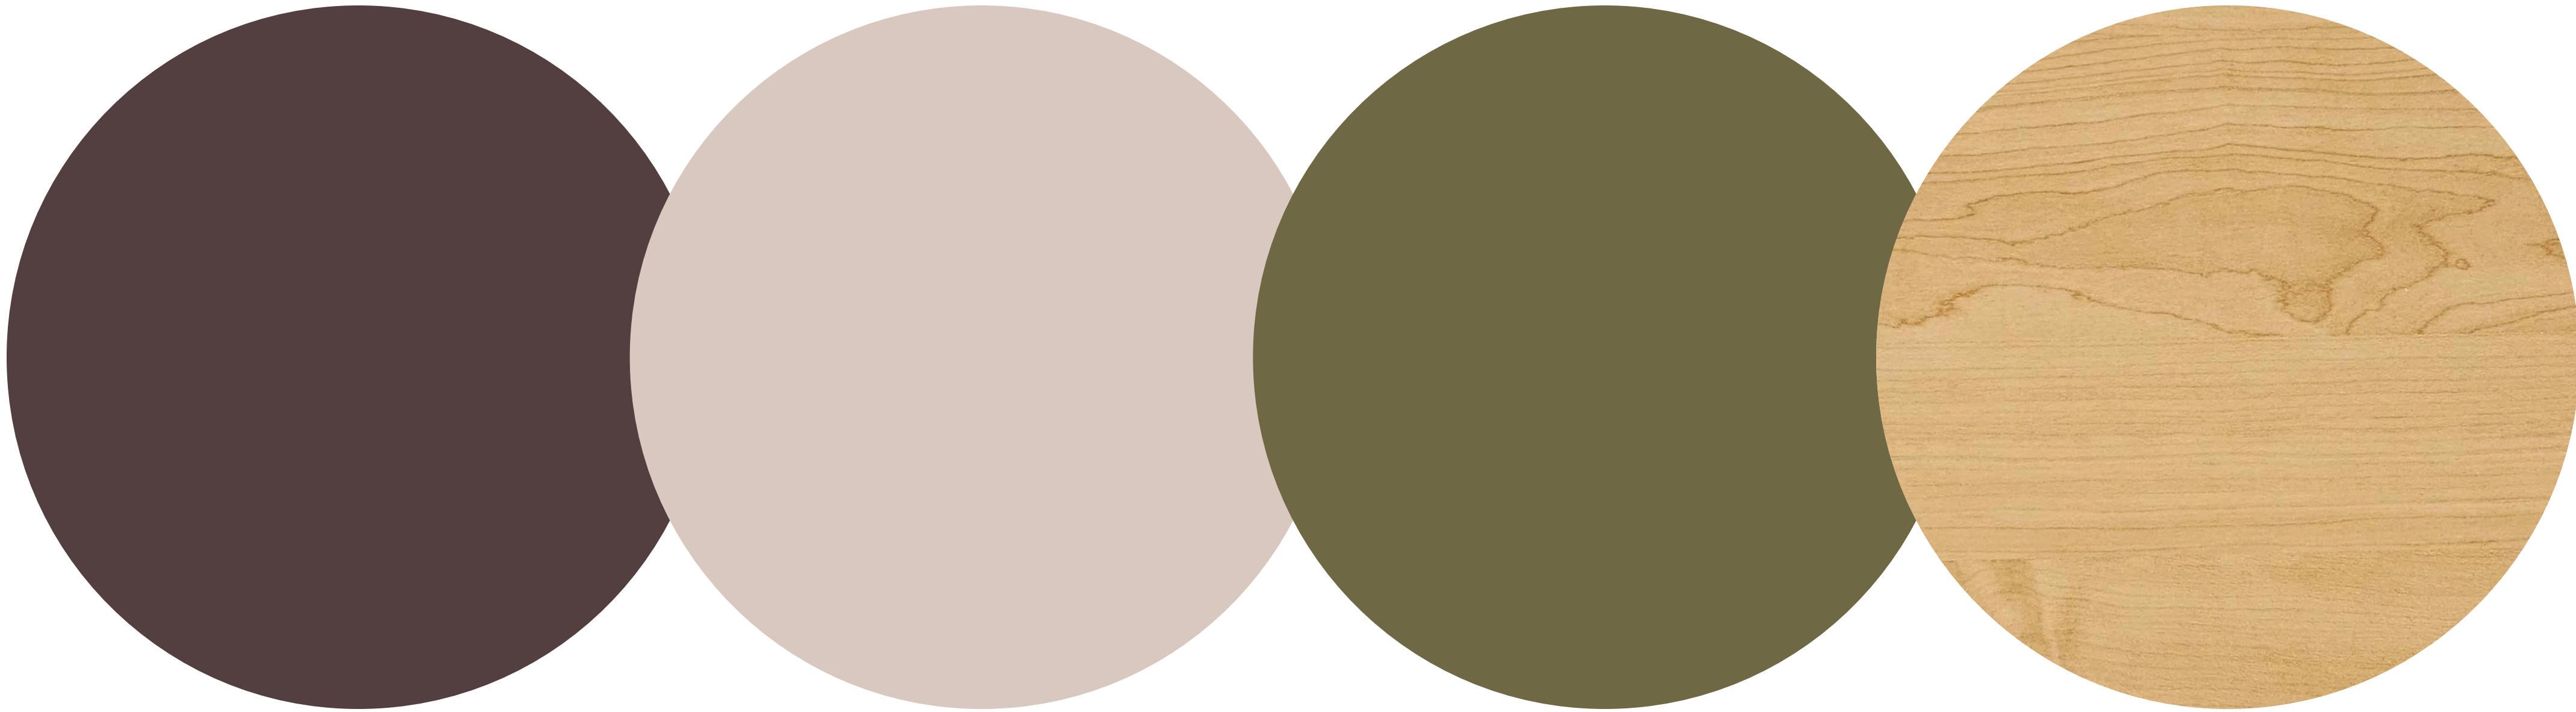

WHAT WE HEARD:

- A study space, not a resting space
- Include noise dampening solutions
- Include color that is calm, not distracting
- Include lighting that can cater to each student
- Include tools that calm the body (fidgets, etc.)

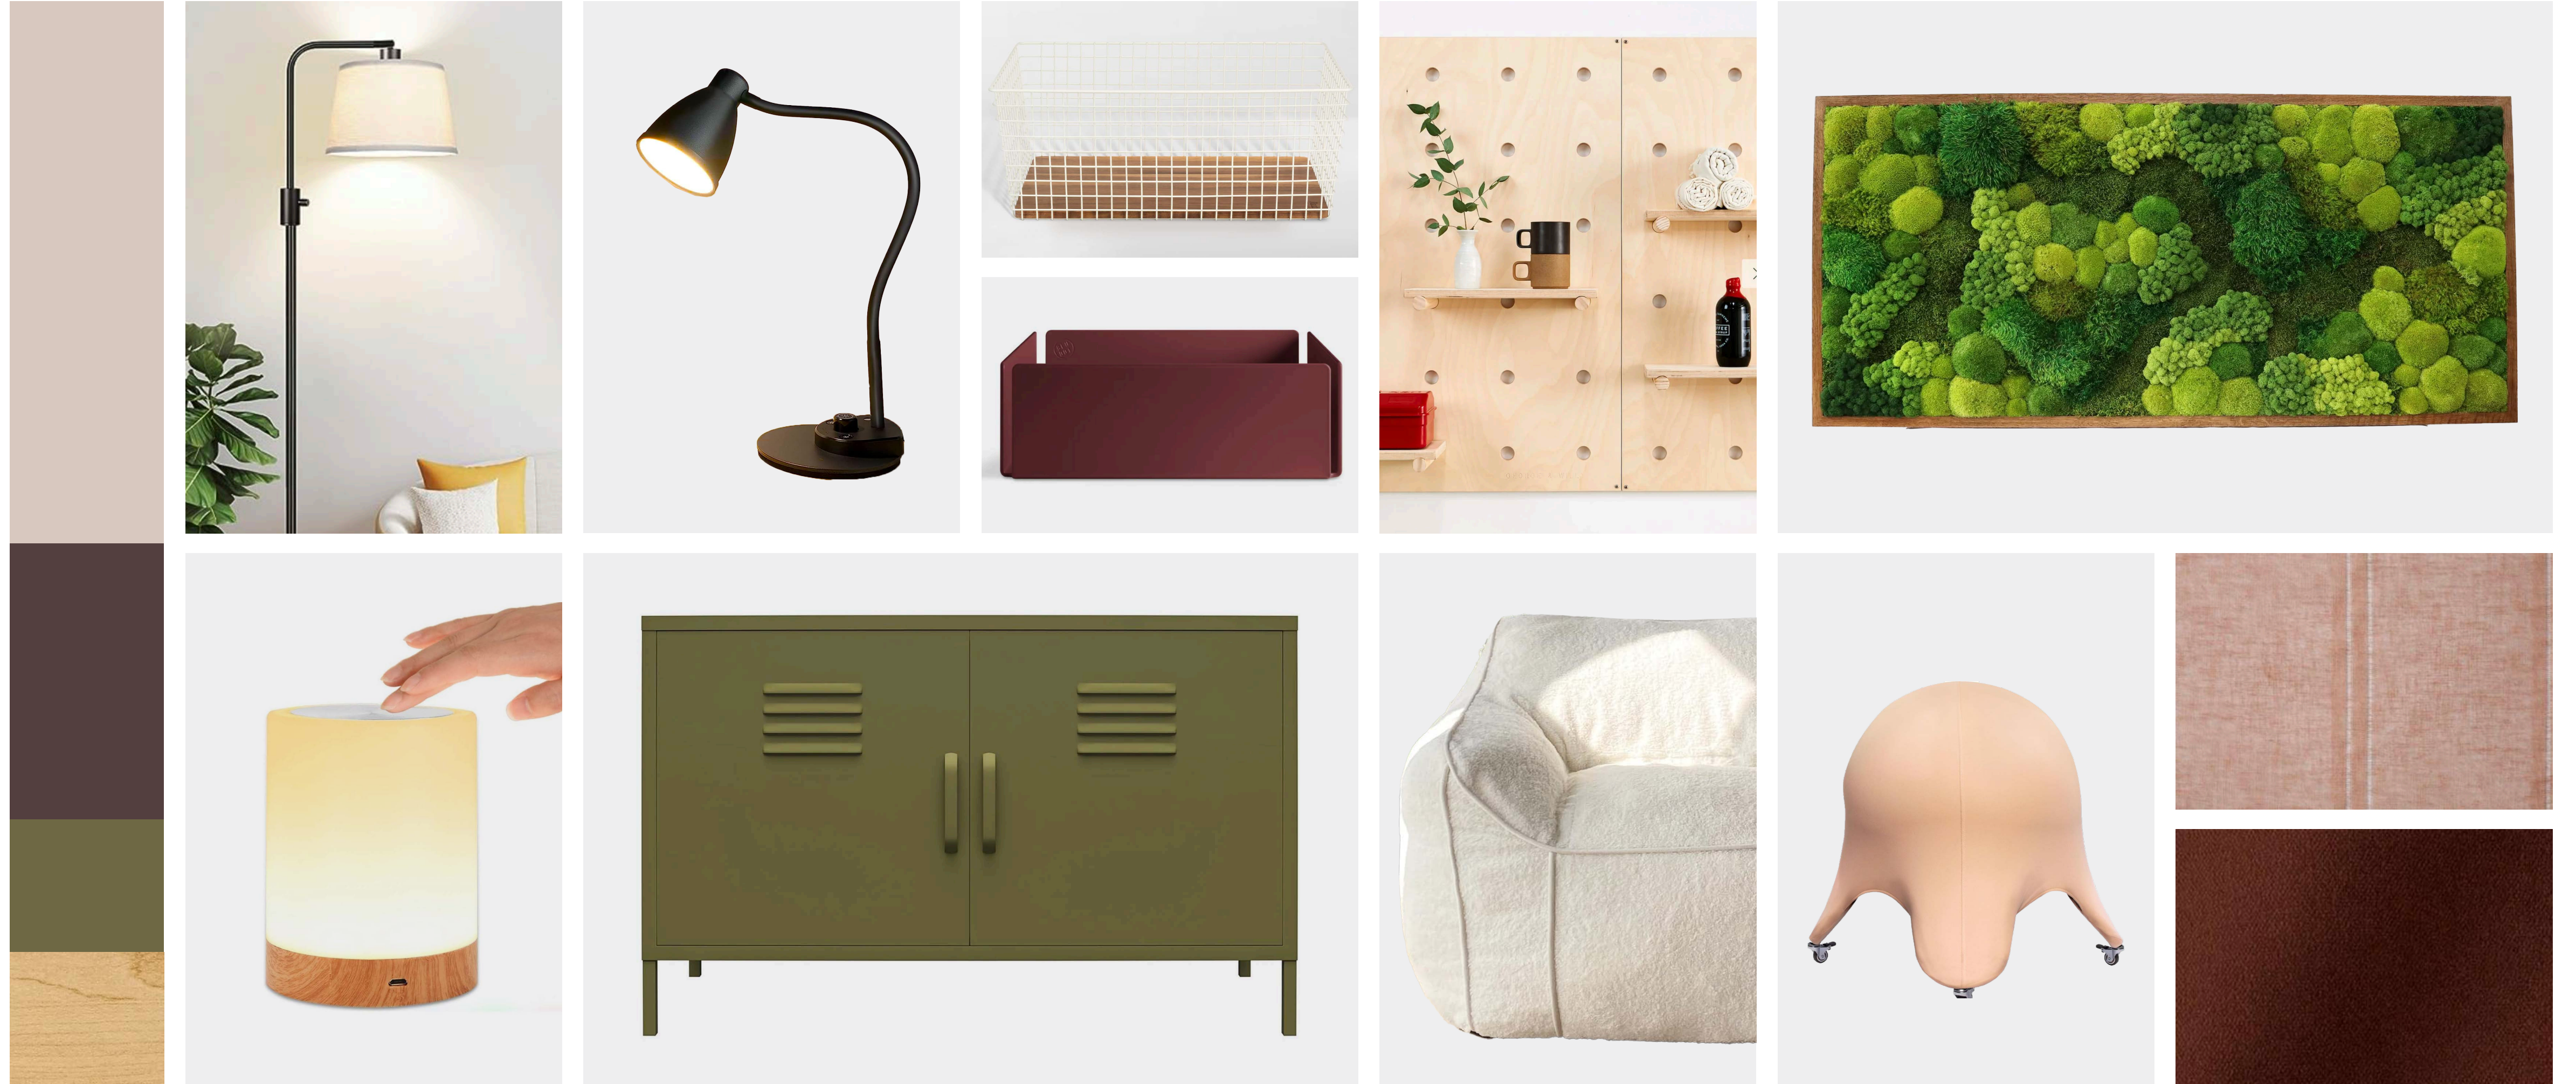

A NOTE ON COLOR:

[Pink] is associated with feelings of nurturing and love, and when lighter shades are used, can be quite soothing...
