

ID	Title	Upload Date	Contest	Judges Rating	Positive Feedback	Opportunities for Improvement
1639	Lowry Bridge Christmas	5-Apr-21	March 2021: Night Sky	9	subject, clarity, reflection & color all make this image pop, you chose a great Fstop to get the starring of the lights, love this	possibly try a landscape or square ratio, the vertical made me feel like I wanted to see more, need more of the right and left so the starred light could have some room
1638	Sunset at the Rookery	5-Apr-21	March 2021: Night Sky	8	great subject and lighting to create the mood, sky is great	either more reflection or more sky and centered as the space on the left is throwing me off
1630	Milky Way over Lake Superior	3-Apr-21	March 2021: Night Sky	8.5	good night photography technique to get a good capture of Milky Way	either foreground needs to be better lit, or make it darker and only a silhouette, I feel like my eye is going there to see what it is instead of looking at the subject
1615	Full Moon	1-Apr-21	March 2021: Night Sky	10	The road coming from the corner of the image, moon in thirds, clarity of the signs, lighting of street lights & moon, the mood made by the clouds over the perfectly lit moon... perfect!!	I could see people in this town wanting to have this image!!
1606	Quiet Road	30-Mar-21	March 2021: Night Sky	5	like the trees on the right	I feel like the trees on the right should've been your subject with more night sky, as the light provided is nicely lighting them
1605	Countryside Darkness	30-Mar-21	March 2021: Night Sky	5	good work getting a somewhat focused image at night as lighting can be tough	Night Sky being the contest title, I feel like I need to see much more sky (with the poles if that was your point of interest)
1604	Moonrise in the Marsh	27-Mar-21	March 2021: Night Sky	7.5	love the landscape with horizontal lines of snow, water, snow, trees then sky and vertical bullrushes on the left. Stunning clear capture of the moon	I feel the two in this picture do not feel right, I get that it's a composite but its very 2 dimensional to me, work it a bit more to make it fit in
1603	Moonrise at the Old Cedar Bridge	27-Mar-21	March 2021: Night Sky	9.5	love it, lines, thirds, lighting, the mood	I feel like I need to see a wee bit more on the left, something going on with the top right of moon
